Policy Regarding Responding to Requests for Artificial Nutrition and Hydration for Patients with Advanced Dementia (UCSD HP 529.1) – UC San Diego Health

Limitation of Life-Sustaining Treatment (UCSD HP 381.1) – UC San Diego Health

Medically Inappropriate (Futile) Treatment – UCLA Health

Prepared a committee report (“Unilateral Withholding or Withdrawing of Medically Inappropriate Life-Sustaining Treatment: ECMO and VAD”) and presented report for the Ronald Regan Medical Center Ethics Committee. The issue under consideration was whether or not hospital policy ought to allow for the unilateral withholding or withdrawing of life-sustaining treatments intended as bridges to transplant or recovery when the patient being considered for or receiving such treatments has been definitively judged not to be a transplant candidate or has no reasonable chance of recovery.

Voluntary Stopping Eating and Drinking – UCLA Health

Prepared a committee report (“Voluntary Stopping Eating and Drinking: Ethical Considerations”) and presented report for a joint session of the Santa Monica Hospital Ethics Committee and the Ronald Regan Medical Center Ethics Committee. The issue under consideration was whether we would include reference to voluntary stopping eating and drinking in our hospital policy on the California End of Life Options Act.
